CAREER SUMMARY

I'm Mubashar Hassan, a Passionate Software Engineer skilled in building full-stack web applications using the MERN and Next.js stacks. Experienced in developing secure authentication systems, AI-powered platforms, and responsive user interfaces. Strong understanding of backend APIs, database design, and performance optimization. Dedicated to delivering clean, scalable, and maintainable solutions.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, MySQL, MongoDB

Tools & Others: Git & GitHub, JWT Authentication, REST APIs, AI Integration, Problem Solving

PROJECTS

Careerly – AI Career Coach

GitHub: github.com/mubashir-hsn/careerly | Live: <https://careerly-ashen.vercel.app>

An AI powered career coach that helps users with smart interview preparation, personalized cover letters, resume building and analyzing, AI chatbot and real time job market insights. The platform also includes an admin panel, user dashboard, subscription plans, token based usage management, and Stripe integration for secure online payments.

Built using Next.js, Gemini API, Prisma, PostgreSQL, and Clerk for secure and efficient performance.

AI Resume Analyzer

GitHub: github.com/mubashir-hsn/ai-resume-analyzer | Live: ai-resume-analyzer-delta-two.vercel.app

A platform that allows users to upload and analyze resumes using AI. It calculates ATS scores, highlights strengths and weaknesses, and provides section-wise tips for improvement—covering skills, structure, summary, and more.

Anonify – Anonymous Feedback Platform

GitHub: github.com/mubashir-hsn/anonymous

Anonify is a modern Next.js-based platform that allows users to receive anonymous feedback securely. Users can signup with NextAuth credentials, verify their email, and share their unique link to get feedback anonymously from others.

Litefit – Ecommerce Website

GitHub: github.com/mubashir-hsn/LiteFit | Live: lite-fit.vercel.app

A platform designed for selling cloth's online. It provides users with a sleek shopping experience and secure payments via Stripe.

Built using MERN with integrated user/admin panels, JWT authentication, email verification, Stripe payment gateway, and real-time stock management.

Stayzio – Blog Platform

GitHub: github.com/mubashir-hsn/Stayzio

Platform that enables users to read, write, and manage blogs effortlessly. It includes an admin panel for content moderation and blog analytics. Built using MERN stack featuring JWT-based authentication, a rich text post editor, and a real-time comment system.

WORK HISTORY

MERN Intern – SFH

Oct 2023 – Jan 2024, Sahiwal

- Built responsive web modules using the MERN stack and Tailwind CSS.
- Implemented JWT-based authentication and CRUD functionalities.

Backend Intern – Web Guru

Feb 2026 – May 2026, Sahiwal

- Developed a Shopify app using the Remix stack handled both frontend UI and backend logic including Shopify API integrations.
- Worked on a Next.js project focused on frontend development, building responsive and performant UI components
